

IMPACT IGNITER

A Direct Path to Being Data-Driven

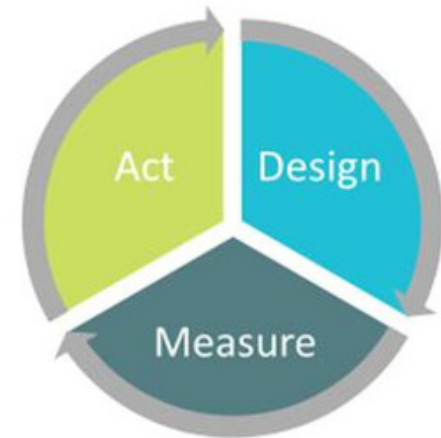

In just six months, our Impact Igniter program can help your organization gain a working understanding of the performance measurement cycle. Our process is designed to help your team learn how to ask powerful questions and use data to answer them. You'll receive 1-on-1 support throughout the Igniter, as well as access to our network of experts to support your development.

Best for organizations who have

- Less than \$1mm in revenue with 0-8 employees
- A craving to develop a learning-based culture and 5-10 hours a month to dedicate to your data practice
- A pressing need to jumpstart a data practice that your staff can manage in-house

Questions You'll Finally Be Able to Answer

- What is the impact we want to achieve, and how will we get there?
- How can we demystify performance management?
- What is the quality of our service delivery?
- Which data should we measure and how?
- How can we get staff excited about data (rather than scared of it)?

IMPACT IGNITER PROCESS

We customize each engagement to your organization's needs, deepening the work where needed, and capitalizing on tools, processes, and practices that are working, while modifying those that are not.

What You'll Do:

2 facilitated cohort learning sessions, monthly interactive webinars, monthly 1-1 coaching, access to your coach as needed

DESIGN PHASE

What You'll Get:

- Grounding in Learning Culture concepts
- Clearly defined learning question

MEASURE PHASE

What You'll Get:

- Measurement Plan including methods and tools
- Data Collection Training and Coaching

ACT PHASE

What You'll Get:

- Analysis Plan
- Training on how to interpret data
- Facilitated data action session

THE RESULT:

One fully developed Impact Measurement Process
Learn the Impact Measurement Cycle

DON'T JUST DEMONSTRATE YOUR IMPACT: MAXIMIZE IT
